

# FULL

## High throughput machine for two users

This fully automatic semi-industrial slicer in continuous operation can slice up to 1,000 loaves/hour. A quality investment for highly-demanding applications.

FULL

A drawer containing two 33 litres collectors for crumb recovery.

This high-capacity ramp (optional) featuring side guides and guide shoes is used to store and take the loaves to the slicer.

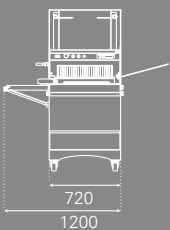

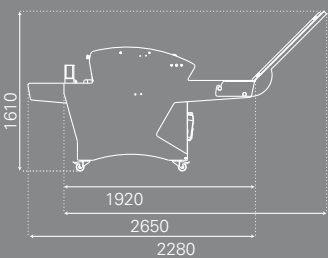

This ingenious system consisting of a rotating bagging spade will allow you to promptly pack several loaves.

Instead of the delivery table and the air-blowing system for bagging sliced loaves, the Full is available with a 60-cm discharge belt.

#### DIMENSIONS (mm)

FULL 520		TECHNICAL SPECIFICATIONS
FEATURES		
Max. loaf dimensions (Lxh) (in cm)	52 x 16	
Power output (in kW)	0,75	
Net weight (in kg)	370	
Air blowing system	included	
CHOICE OF		
Slice thickness (in mm)	from 9 to 16	
Loaf height	normal	
Type of motor 400/230V	three-phases	
OPTIONS		
Loading ramp	<input type="radio"/>	
Discharge belt instead of air blowing system	<input type="radio"/>
